# MOLECULAR DIAGNOSTIC CONTROLS IN SWAB FORMAT

Labcare Microbiologics

## Full Process Monitoring With Molecular QC in Swab Formats

At Microbiologics we design quality controls to provide comprehensive challenges to diagnostic instrumentation and techniques. For assays that process patient samples collected via swab, we offer a broad portfolio of molecular controls in swab formats to monitor every step of the diagnostic procedure, from sample collection and handling to target detection. Just like our QC in pellet format, these swab controls combine precision with convenience to ensure the accuracy patients deserve.

## Confidence in Your Results

- Designed to be handled like true patient samples
- Multiple platform compatibility
- Lyophilization allows for easy storage, reduces transport costs, and ensures stability
- IVD controls and panels provide the highest levels of assurance
- Third-party controls deliver independent assessments of assay performance
