Puritan®

FORENSICS & GENETICS

In the search for verifiable identity, DNA is key. Puritan has the tools of choice used in forensics, rapid diagnostics, pharmacogenetics, veterinary, ancestry, and genetics research sampling.

All products collect and release efficiently and reliably, manufactured with controls to protect against human contamination.

See our full line of DNA-free and DNA-controlled products that best suit your process.

3 DNA-free swab options. 1 standard of excellence.

Which DNA-free swab is right for you?

DNA-FREE PURFLOCK ULTRA®

Puritan's DNA-free PurFlock Ultra® flocked swabs are designed to both collect and elute more specimen.

- Packaged individually in its own transport tube
- Ideal for PCR, molecular assays, DFA, and direct antigen testing

DNA-FREE FOAM

With an absorbent tip and large round head, our DNA-free foam swab is ideal for buccal cell collection.

- Large swab surface helps maximize sample concentration
- Soft tip for patient comfort
- Ideal for buccal cell collection

DNA-FREE COTTON

Ideal for blood specimen collection and buccal swabbing, this multi-purpose swab is a go-to for your toolkit.

- Sterile DNA-free cotton swabs – 1 or 2 per package
- Sturdy wooden handle
- Individually wrapped or packaged in a dry transport tube

DNA/RNASE FREE

All of our DNA-free products are certified to be DNA-free, DNase-free, and RNase-free. Designed specifically for DNA testing, buccal swabbing, these multipurpose swabs are a go-to in the crime scene investigation industry.

	Item No.	Product Description	Tip length x diameter	Full Length	Packaging pack, weight
non-sterile sterile					
	25-806 1WC FDNA	Standard cotton tip, wood handle	15.875 x 4.775 mm 0.625 x 0.188"	150.8 mm 5.937"	10/100/1, 6 lbs
	25-806 2WC TT FDNA	Standard cotton tips, wood handles, dry transport tube	15.875 x 4.775 mm 0.625 x 0.188"	150.8 mm 5.937"	10/50/2, 9 lbs
	25-1805 1PF RND FDNA	Large foam paddle tip, polypropylene handle	28.575 x 23.012 mm 1.125 x 0.906"	120.175 mm 5.125"	10/50/1, 6 lbs
	25-3306-U TT FDNA	Standard PurFlock Ultra® tip, polystyrene handle with 80 mm breakpoint, dry transport tube	17.526 x 5.08 mm 0.69 x 0.2"	153.416 mm 6.04"	10/50/1, 9 lbs

DNA-CONTROLLED SWABS

All DNA-controlled swabs are manufactured in a DNA-controlled environment. Filtered air breathable (FAB) transport systems have a patented tube design for product breathability.

	Item No.	Product Description	Tip length x diameter	Full Length	Packaging pack, weight
non-sterile sterile					
	25-805 IPC TT FABUSA	Standard cotton tip, polystyrene handle, patented tube design for product breathability	17.449 x 5.156 mm 0.687 x 0.203"	127 mm 5"	10/50/1, 8 lbs
	25-825 1WCS TT FABUSA	Small pointed cotton tip, wood handle, patented tube design for product breathability	12.7 x 3.048 mm 0.5 x 0.12"	129.41 mm 5.095"	10/50/1, 8 lbs
	25-806 IPC BT FABUSA	Standard cotton tip, polystyrene handle, patented tube design for product breathability	15.875 x 4.775 mm 0.625 x 0.188"	152.4 mm 6"	10/50/1, 8 lbs
	25-3606-U BT FABUSA	Elongated PurFlock Ultra® tip, polystyrene handle with 30 mm molded breakpoint, patented tube design for product breathability	17.399 x 5.563 mm 0.77 x 0.219"	153.416 mm 6.04"	10/50/1, 8 lbs

Did you know?

Filtered air breathable (FAB) swab & transport system. Our patented technology uses a breathable Tyvek® filter that covers holes, allows air in and keeps contaminants out, maintaining sample viability during transport.

Air breathable holes
Let air in while keeping contaminants out

FEATURED PRODUCT:
DNA-controlled Transport System (#25-806 IPC BT FABUSA)

Handle of swab stays firmly in place

Make multi-step specimen collection faster + simpler. Use Puritan's Cap-Shure tipped applicator.

Our Cap-Shure line of applicators is uniquely crafted for the collection of fragile evidence, such as blood, saliva, latent print residue, or other physiological fluids, ensuring the integrity of each sample.

Our most popular option is available with a cotton tip produced from high quality US Pharmaceutical Grade cotton which we card onsite in order to maintain consistency.

The forensic swab tip is securely bonded to a wood or polystyrene handle, and the contaminant-free aerated cap protects the tip from cross-contamination to ensure the quality of each specimen. Each applicator comes sterile and individually wrapped. The ventilated cap allows for normal air-drying and lays flat for easy transport.

Cap-Shure products are available with flock, foam, or cotton swab tips, and with wood or polystyrene handles.

CAP-SHURE® COLLECTION DEVICES

Named one of *Forensic Magazine's* Reader's Choice Best Forensic Products. Cap-Shure® features a unique aerated cap to prevent cross-contamination during transport. Can lay flat to air dry.

FEATURED PRODUCT: Cap-Shure® collection device with wood handle (#25-806 1WC EC)

	Item No.	Product Description	Tip length x diameter	Full Length	Packaging pack, weight
	non-sterile sterile				
	25-806 1WC EC	Standard cotton tip, wood handle, aerated tip protector	15.875 x 4.775 mm 0.625 x 0.188"	152.4 mm 6"	10/50/1, 7 lbs
	25-806 1PC EC	Standard cotton tip, polystyrene handle, aerated tip protector	17.47 x 5.15 mm 0.688 x 0.203"	152.4 mm 6"	10/50/1, 7 lbs
	25-807 1PC EC	Standard cotton tip, polystyrene handle, aerated tip protector	17.45 x 5.156 mm 0.687 x 0.203"	177.8 mm 7"	10/50/1, 9 lbs
	25-3206-H EC	Elongated HydraFlock® tip, tapered polystyrene handle, no breakpoint, aerated tip protector	19.558 x 5.563 mm 0.77 x 0.219"	150.62 mm 5.93"	10/50/1, 8 lbs
	25-3206-U EC	Elongated PurFlock Ultra® tip, tapered polystyrene handle, no breakpoint, aerated tip protector			

Products for DNA sampling or field evidence. Specimen collection is covered.

CRIME SCENE

DNA-free, RNase-free, +
DNA-controlled applications

Forensic professionals rely on Puritan swabs for clean and accurate sampling. Now you can feel even more confident. Puritan DNA free swabs are in compliance with ISO 18385 standard and are free of detectable DNase and RNase free.

Our collection of DNA-controlled swabs are manufactured in a DNA-controlled and monitored cleanroom environment.

DETAILS	
PRODUCTS	<ul style="list-style-type: none"> • DNA-free sampling swabs & transport systems • DNA-controlled sampling swabs & transport systems • Cuticle sticks • Wound measuring products
TARGETED SAMPLES	Sweat, semen, blood stains, skin, other
APPLICATIONS	DNA-free, RNase-free of human DNA, ensuring accurate results
TYPES	Specimen evidence collection, trace evidence collection

GENETICS + HUMAN IDENTIFICATION

Human identity +
genomic DNA sampling

The key to effective buccal swab sample collection is to make sure you've got the right tools on hand. Puritan offers a wide variety of sterile diagnostic sampling devices for collecting and transporting various cell types for DNA analysis.

Due to their high particle absorption and soft tips, foam swabs are a popular choice. Because of their superior collection and elution properties, flocked swabs are quickly gaining popularity for buccal cell collection.

DETAILS	
PRODUCTS	<ul style="list-style-type: none"> • DNA-free sampling swabs & transport systems • DNA-controlled sampling swabs & transport systems

TYPES	Buccal cell collection, specimen evidence collection

Puritan® patented flock swab technology. HydraFlock® and PurFlock Ultra®!

Puritan is the only flock swab manufacturer which holds patents for our HydraFlock and PurFlock Ultra collection devices.

Our proprietary manufacturing process offers swabs with multi-length flock fibers providing you with increased surface area for the most efficient collection and elution on the market.

UNIQUE FIBER STRUCTURE

PurFlock Ultra®'s purity makes it ideal for forensic applications and its uniquely designed multi-length fiber structure accounts for better cell yield in the specimen where sample size is limited. Puritan's patented HydraFlock® and PurFlock Ultra® swabs come in various tip shapes, making them perfect for buccal cell, specimen, DNA, forensic evidence collection, and rapid diagnostic testing. Swabs are also available with pre-molded breakpoints for automated specimen processing.

INCREASED SURFACE AREA

HydraFlock® has the same multi-length fibers as PurFlock Ultra®, but each of those fibers are then split, resembling a floret structure. This structure vastly increases surface area, leading to enhanced, rapid absorption and quick release of biological specimens.

Did you know?

Puritan's HydraFlock® swabs are made from multi-length fibers; **each fiber is comprised of 36 strands** of a proprietary polyester blend.

HYDRAFLOCK® AND PURFLOCK ULTRA® FLOCKED SWABS (PATENTED)

Our proprietary manufacturing process offers swabs with multi-length flock fibers providing you with increased surface area for the most efficient collection and elution on the market.

	Item No.	Product Description	Tip length x diameter	Full Length	Packaging pack, weight
	non-sterile sterile

	25-806 1WC	Standard tip, wood handle	15.875 x 4.775 mm 0.625 x 0.188"	150.8 mm 5.937"	10/100/1, 6 lbs
	25-806 2WC				10/100/2, 7 lbs
	25-826 5WC	Tapered mini tip, wood handle	12.7 x 3.048 mm 0.5 x 0.12"	152.4 mm 6"	10/20/5, 4 lbs

DRY TRANSPORT TUBE SYSTEMS

For the collection and transport of specimen when no medium is required. Various handle, tip, and tube configurations available. Swabs are sterile and sealed in tube. Other configurations are available, see our website for the entire line.

	Item No.	Product Description	Tip length x diameter	Packaging pack, weight
non-sterile sterile				
	25-806 1PC BT	Standard cotton-tipped swab, polystyrene handle, dry transport tube, pink cap	17.449 x 5.156 mm 0.687 x 0.203"	5/100/1, 7 lbs
	25-806 1WC BT	Standard cotton-tipped swab, wood handle, dry transport tube, pink cap	15.875 x 4.775 mm 0.625 x 0.188"	5/100/1, 7 lbs
	25-3306-U BT	Standard flock-tipped swab, tapered polystyrene handle with 80 mm breakpoint, dry transport tube, red cap	17.526 x 5.08 mm 0.69 x 0.2"	5/100/1, 7 lbs
	25-3406-U BT	Large flock-tipped swab, tapered polystyrene handle with 80 mm breakpoint, dry transport tube, red cap	16.256 x 5.563 mm 0.64 x 0.219"	5/100/1, 7 lbs
	25-3606-U BT	Elongated flock-tipped swab, tapered polystyrene handle with 30 mm breakpoint, dry transport tube, white cap	17.399 x 5.563 mm 0.685 x 0.219"	5/100/1, 7 lbs

Quality collection products that get the job done.

Two essential products for your toolkit.

ROUND FOAM SWABS

This sterile buccal swab with round medical-grade foam tip provides an extra-large surface for maximum sample collection and preservation. It's used extensively for the collection of saliva and buccal cells to be transferred to FTA cards.

CUTICLE STICKS

Cuticle sticks are an excellent tool for the collection of trace DNA evidence such as skin cells, which can be found under the fingernails of an assault victim. Each stick is individually wrapped to prevent cross-contamination.

ROUND FOAM-TIPPED APPLICATORS

Buccal swabbing, or swabbing the inner cheek to collect cells, is an easy, quick and noninvasive way to collect a donor's DNA. Also known as the lollipop swab, with an absorbent tip and large round head, our round foam swab is ideal for buccal cell collection.

FEATURED PRODUCT: Foam-tipped applicator with large round tip (#25-1805 1PF RND)

	Item No.	Product Description	Tip length x diameter	Full Length	Packaging pack, weight
	non-sterile sterile				
	25-1805 1PF RND	Large round tip, polypropylene handle	28.75 x 23.012 mm 1.125 x 0.906"	130.175 mm 5.125"	10/50/1, 6 lbs

CUTICLE STICK

Cuticle sticks are an excellent tool for the collection of trace evidence such as skin cells, which can be found under fingernails of an assault victim.

	Item No.	Product Description	Dimensions length x diameter	Packaging pack, weight
	non-sterile sterile			
	2911	Wood, double bevel both ends, individually wrapped	177.8 x 3.962 mm 7 x 0.156"	4/250/1, 6 lbs

PurSafe®

Simplify specimen collection and preservation for your forensic and DNA needs.

Puritan®'s HydraFlock® swabs assure you are collecting ample amounts of available specimen.

COMING SOON!
PurSafe Plus®
with added features and benefits!

LEAK-PROOF CAP

Light blue for easy identification.

DNA/RNA PRESERVATIVE

Compatible with preservation of DNA/RNA from bacteria, viruses and tissues

STABLE NUCLEIC ACID

Conveniently stable at ambient temperatures up to 30 days

PATENTED MULTI-LENGTH FIBERS

The increased surface area of HydraFlock® assures maximum collection.

TAPERED POLYSTYRENE HANDLE WITH BREAKPOINT

Breaks off easily into vial.
