

Para 12[®] Extend

Para 12 Extend is a whole blood hematology control which offers complete assay values for the three-part white blood cell differential. It features vials with pierceable caps for autosampling and is available in low, normal and high levels. Para 12 Extend is compatible with Abbott, Beckman Coulter, Erma, Horiba Medical, HTI Diagnostics, Mindray, Nihon Kohden and Siemens three-part hematology analyzers.

Features

- + Whole blood three-part differential hematology control
- + Available in three clinically significant levels
- + Plastic vials with pierceable caps for analyzer autosampling
- + Compatible with the most popular three-part differential hematology analyzers
- + 30-day open-vial stability
- + 190-day closed-vial stability

Benefits

- + Helps clinical laboratories meet quality requirements
- + Established assay ranges provide less room for error
- + Long shelf life reduces the number of shipments and associated costs
- + Fewer lot-to-lot correlations save time and resources
- + Access to *STATS*[®], a free interlaboratory quality control program with peer group data comparison and online submission
